

Gold dust responses

Safeguarding 2

Know the **4 types of abuse** - **physical, emotional, psychological and neglect**. All have different signs but usually linked to a **change in behaviour**.

FGM is female genital mutilation which is unsafe and unethical. **I must help stop this happening** by being aware if young girls are going away for a long holiday for a big celebration. **I must be aware of signs this has happened** like trouble walking, reluctance to be changed or increased anxiety.

CSE is child sexual exploitation is a **form of child sexual abuse**. It occurs where an individual or group **takes advantage of an imbalance of power** to coerce, manipulate or deceive a child or young person under the age of 18 **into sexual activity**.

CCE is child criminal exploitation. It is a **form of child abuse**. It is where a group or individual **takes advantage of an imbalance of power** to coerce, manipulate or deceive a child or young person under the age of 18 **into criminal activity**.

PREVENT DUTY is my responsibility to help **prevent people being drawn towards extremism** and, ultimately, terrorism. This is **radicalisation**.

We know that some children have access to online devices and we are aware of anything they may mention about being online to keep them safe.

During a disclosure, don't add details, ask leading questions or promise confidentiality. Listen well and offer reassurance and support. We can use **TED Tell me... Explain... Describe**. Disclosures must be reported to the DSL **without delay**.

We must **be aware of the whole family dynamic** to be mindful of older siblings too. We get to know the whole family. Our starter packs ask about a child's home situation and we discuss with children what life is like outside the setting. **We are vigilant to any signs that their siblings or other family members may be at risk of specific safeguarding issues and report this to the DSL.**

All safeguarding information must be treated **confidentially**. This means that information can only be shared with persons who have **relevant authority** to know the information. **Confidentiality must never delay sharing information.**
